For your child's safety

WARNING!

Inspect carefully before each use. Throw away at the first signs of damage or weakness. Not suitable for microwave or steam sterilization treatment.

Please keep product and using instructions.

In case of a complaint: keep manufacturer address and article number.

This product complies with EN 71.

Information for use:

As long as first teeth have not appeared

The teether gently massages the gum and reduces pain. The diverse surface structure provides variety.

As soon as the first teeth appear

Thanks to the flexibility and the protrusions of the Teether the back portion of the mouth is well massaged and can therefore, reduce pain during the teething process.

As soon as further teeth appear

The Teether Star now satisfies the natural chewing desire.
